

HYPSM

PROJECT EIDEE // EDITORIAL BLUEPRINT & PRECISION SYSTEMS

Designing the Ideal Incubator for Eidee Laurel Tan

An Architectural Blueprint for Human & Machine Intelligence, Computation, and Institutional Ethics at HYPSM

HUMAN-MACHINE INTERFACE DIAGRAM // REV. A.01

STRATEGIC BRIEFING // DATE: OCT 2027 // REF: T27-CSB-001

Fall 2027 Cohort
Strategic Briefing

EVIDENCE KEY

- [F] Verified Fact
- [S] Self/Family Report
- [A] Aspiration/Assumption
- [I] Inference
- [U] Unknown

The objective is not “getting into HYPISM for pre-law.” It is designing a structured education in cognition and computational systems.

The Standard Pre-Law Collage

The Systems Design Architecture

Insight: Eidee requires a single cohesive degree that unites these fields, rather than assembling expertise from unrelated electives. Law is the eventual application domain; intelligence and systems design must be the undergraduate spine.

EVIDENCE KEY:

[F] Verified Fact | [S] Self/Family Report
[A] Aspiration/Assumption | [I] Inference | [U] Unknown

The Profile Logic Gate: Translating inputs into ideal institutional architecture.

The 7-Dimension Fit Model: A bespoke rubric prioritizing interdisciplinary coherence and technical depth.

Admissions selectivity and **prestige** are deliberately **excluded**. This model measures pure academic and structural alignment with Eidee's profile.

Evidence Key:

[F] Fact | [S] Self Report | [A] Aspiration | [I] Inference | [U] Unknown

Baseline Diagnostic Matrix: Stanford and Princeton lead under the M0 + E0 scenario.

Dominates because it is the only option that structurally integrates all core interests into a single degree.

Primary Pathway	Total Score	Cog/Tech/Soc	Technical	Law/Ethics	Structure	Feasibility	Research	Violin
Stanford SymSys-HAI	95.0							
Princeton COS + 2 minors	89.8							
MIT Course 9 + STS	89.2							
Yale Cognitive Science	88.2							
Harvard Psych-MBB	83.6							

Stanford University: The cleanest single-degree articulation of Eidee's thesis.

Pathway Equation Symbolic Systems B.S. + Human-Centered AI (HAI) Concentration [I/F]

GATE: G3 (Structurally Available) | **CONFIDENCE:** A | **SCORE:** 95.0

Structural Diagram

Logic Chain

Research & Violin

Stanford HAI undergrad labs; non-major ensembles and auditioned lessons available.

Caveat

Highly flexible program requires strict personal discipline to avoid diffusion without a tight capstone theme.

Evidence Key:

- [F] Fact
- [S] Self Report
- [A] Aspiration
- [I] Inference
- [U] Unknown

Princeton University: Deep technical infrastructure bridged formally to policy and cognition.

Pathway Equation

Computer Science (COS) A.B. + Cognitive Science + Computing, Society & Policy [F]

GATE: G2 (Application Dependent) | CONFIDENCE: A | SCORE: 89.8

Structural Diagram

Logic Chain

Research & Violin

Independent work culture is built-in; high-level auditioned ensembles and studio instruction via Music Performance minor.

Caveat

Gate Risk: Fitting two minors around COS, gen-ed, and violin requires flawless early scheduling and application.

Evidence Key:

[F] Fact
[S] Self Report
[A] Aspiration
[I] Inference
[U] Unknown

Massachusetts Institute of Technology: Unmatched scientific foundation with a structured societal lens.

Pathway Equation

Brain & Cognitive Sciences S.B. (Course 9) + STS Minor [F]

GATE: G3 (Structurally Available) | CONFIDENCE: A | SCORE: 89.2

Structural Diagram

Logic Chain

Research & Violin

Unmatched UROP framework; Emerson/Harris program for auditioned private study.

Caveat

Pulls heavily toward scientific depth at the expense of legal/institutional writing. The STS minor must be actively protected.

Evidence Key

- [F] - Nermalin-coropenent
- [S] - Account thrsom
- [A] - Aerospace snalqs
- [I] - Fhuisition Key
- [U] - Technical Procesting

Yale University: Empirical breadth paired with bespoke computational and ethical depth

Pathway Equation

Cognitive Science B.S. (Custom computational decision-making focus) [F/I]

GATE: G2 (Approval Dependent) | CONFIDENCE: A | SCORE: 88.2

Structural Diagram

Logic Chain

Research & Violin

Wu Tsai Institute undergrad fellowships; extensive Yale School of Music performance programs for non-majors.

Caveat

Law/policy coherence is designed by Eidee, not supplied as a named concentration. Requires active advisor approval.

Evidence Key:

[F] Fact
[S] Self Report
[A] Aspiration
[i] Inference
[U] Unknown

Harvard University: Interdisciplinary, thesis-driven inquiry into mind and behavior.

Pathway Equation
Psychology A.B. + Cognitive Science MBB Track [F]

GATE: G3 (Structurally Available) | CONFIDENCE: A | SCORE: 83.6

Research & Violin

Berkman Klein Center (highly competitive); ensemble access broad, private lessons via audition-based subsidies.

Caveat

Less technically automatic. Computation, statistics, and technology governance must be deliberately added as electives.

Evidence Key	
[F]	- Nermalin-coropenent
[S]	- Account thrsom
[A]	- Aerospace snolqs
[i]	- Fhuision Key
[U]	- Technical Procesting

Scenario Parameter 1: The Economics Intensity Dial.

Turning the dial to E1/E2 fundamentally shifts the map away from purely cognitive pathways toward **algorithmic market regulation**.

Evidence Key

[F] - Fact
[S] - Self Report
[A] - Aspiration
[i] - Inference
[U] - Unknown

Scenario Parameter 2: The Music Intensity Dial.

Harvard + New England Conservatory (A.B./M.M.)

Study Economics or Government at Harvard while earning an NEC Master's.

[G2 - Dual Audition/Admission]

Yale B.A./M.M.

Open to non-music majors, allows Cognitive Science or CS alongside a Yale School of Music credential.

[G2 - 5-Year Track]

At M2, music is no longer an extracurricular variable—it fundamentally dictates the structural viability of the institution.

Evidence Key
[F] - Fact
[S] - Self Report
[A] - Aspiration
[i] - Inference
[U] - Unknown

The Synthesis: The institution does not dictate the path. The parameters do.

Core Insight: The decision sequence is not "Which school is best?"
It is "Choose the M parameter, then choose the E parameter, then select the corresponding institutional architecture."

Evidence Key

[F] - Fact
[S] - Self Report
[A] - Aspiration
[i] - Inference
[U] - Unknown

Next Steps: Verification and Strategic Execution

PROJECT MILESTONES PUNCH-LIST

☐ **01**

Parameter Lock

Eidee must definitively rank priorities: Is economics co-equal to cognition? (Set **E-Dial**). Is a 5-year dual music degree desired? (Set **M-Dial**).

← [Decision Point]

☐ **02**

Technical Floor Definition

Define precise computing appetite (willingness to take engineering-level algorithms vs. data science/Python).

← [Appetite Gauge]

☐ **03**

Data Verification

Obtain official transcript, AP score report, and full violin activity ledger (with exact dates/hours) to confirm assumed gate prerequisites [**S** → **F**].

← [Document Flow]

← [S → F Conversion]

☐ **04**

2027 Stress Test

Re-verify Princeton minor overlap rules, Yale CogSci application rates, and Harvard NEC dual-cohort sizes for the Fall 2027 entry cycle.

← [Cycle Analysis]

WARNING

This is a curricular-fit architecture. Do not adjust application volume until residency, finances, and finalized parameter choices are locked.

Evidence Key

[F] - Fact
[S] - Self Report
[A] - Aspiration
[i] - Inference
[U] - Unknown
